DETAILED ACTION

1. Claims 1-11 are currently pending in the application.

Drawings

2. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A method for determining jitter in a packet network is method for calculating number. The method for determining jitter in a packet describes nothing more than a manipulation of basic mathematical constructs, the paradigmatic "abstract idea". The claimed invention as a whole must be useful and accomplish a practical application. That is, it must produce a "useful, concrete and tangible result." The method for determining jitter in a packet of claim 1-11 has no

physical structure, does not itself perform any useful concrete and tangible result, and thus considers nonstatutory.
